

LAKSHAY PAHWA

Software Engineer | Full-Stack Development • React.js • Node.js • MongoDB • MySQL

lakshaypahwa47@gmail.com | +91-6396339806 | github.com/pahwajii | linkedin.com/in/lakshay-pahwa-a45991251 | [Portfolio](#)

PROFESSIONAL SUMMARY

Entry-level Software Engineer with a foundational grounding in programming concepts, software design, and software development principles, built through 5+ months of internship experience. Applies analytical methods to solve engineering problems and collaborates effectively with cross-functional teams.

EDUCATION

B.Tech in Computer Science & Engineering

2022 – 2026

Bundelkhand Institute of Engineering & Technology (BIET), Jhansi

CGPA: 8.19/10.00

TECHNICAL SKILLS

Programming	JavaScript (ES6+), TypeScript, C++, Programming Concepts, Data Structures & Algorithms
Frontend	React.js, HTML5, CSS3, jQuery, AJAX
Backend	Node.js, Express.js, REST API Design, MVC Architecture, Software Design, Webhooks
Databases	MongoDB, MySQL, PostgreSQL, Firebase Firestore, Redis
Tools & Practices	Git, Postman, Jest, Docker, Vercel, Render, SDLC, Agile/Scrum, Code Reviews, Optimization

WORK EXPERIENCE

Software Engineer Intern — Hanabi Technologies

Dec 2025 – Feb 2026

- Applied software engineering practices to design, develop, and maintain 6+ RESTful APIs consumed by React-based client applications; validated end-to-end request-response behavior using Postman.
- Analysed and solved integration problems while incorporating the OpenAI content-moderation API (video, audio, text), achieving ~95% classification accuracy with robust error handling and retry logic.
- Authored API contracts and 15+ Jest unit/integration test scenarios covering failure paths, collaborating with team members to support CI workflows and maintain code quality standards.

Software Developer Intern — Good Dopamine Technologies Pvt. Ltd.

Nov 2025 – Dec 2025

- Engineered Node.js/Express APIs following MVC software design architecture for a collaborative video-editor; worked co-operatively with engineers and stakeholders in design reviews and agile sprint planning.
- Implemented RBAC permission handling (3 user roles) with detailed access-control logic; maintained documentation to support team-wide knowledge sharing and onboarding.

Software Engineer Intern — Veridia.io

Sept 2025 – Oct 2025

- Applied scientific and analytical methods to debug MySQL/MongoDB query patterns and restructure indexing strategies, reducing average query execution time by ~20%.
- Identified API performance bottlenecks through structured profiling and original analysis; applied Redis caching to cut response time by ~15% and documented scalability recommendations for the team.

PROJECTS

Research Paper Reading Tracker

Feb 2026

React | TypeScript | Node.js | Express | MySQL | MongoDB | JWT | Recharts | Vercel/Render

- Designed and developed a full-stack web application with a React/TypeScript frontend (Recharts analytics: funnel, scatter, stacked bar) and a Node.js/Express REST backend; deployed on Vercel + Render.
- Implemented JWT authentication with per-user data isolation; validated all endpoints in Postman with structured test cases covering auth, CRUD, analytics, and edge cases.

Post-It — Real-Time Social Media Platform

Sept 2025

Node.js | Express.js | MySQL | MongoDB | Socket.io | jQuery | AJAX | HTML/CSS

- Built a full-stack social platform applying sound software design principles: real-time WebSocket messaging (Socket.io), a REST API backend, and a jQuery/AJAX frontend for zero-reload feed and notification updates.
- Designed RESTful URL routing and dual MongoDB/MySQL data models; applied BFS graph traversal for social connection recommendations.

Subscription-based Payment System (Razorpay)

Jan 2026

Node.js | MySQL | Razorpay API | Webhooks | Jest | OOP

- Developed webhook-based payment reconciliation covering the full subscription lifecycle; reduced failed-transaction fallback by ~40% via Regex-based event classification and retry logic.
- Documented 10+ API routes with edge-case test decisions; maintained a shared knowledge base of failure modes, improving team debugging speed across sprint cycles.

ACHIEVEMENTS & CERTIFICATIONS

- GATE 2026 Qualified** | **LeetCode**: Rating 1817 (Top 6%), 300+ problems, strong DSA | **CodeChef**: 3★, Rating 1654
- TCS CodeVita S13** – Global Rank 2028 | **Oracle Cloud 2025** – Data Science Professional & AI Foundations Associate
- Secretary, T&P Cell** – Led placement drives & stakeholder communication for 200+ students
